

# Worker Models

# Worker™ Model

## Technical Data and Features

**GENERAL:** Most of God's animals defend themselves with natural knives. Hawks and cats have knives on their feet. Some have knives in their mouths. Others sport antlers. Puffer fish, porcupines, and sea urchins have entire bodies that keep trouble away.

Even some plants are armed. The beautiful rose uses thorns, while the spiny cactus warns trouble away in a similar way.

Only humans and sheep dare exist without natural protection. Arguable the most defenseless of all animals humans protect themselves by relying on their tools. In this case, sharp tools. The Worker CLIPIT™, provides urban dwellers with a cutting tool that gives users a feeling of security.

While the Worker model is not attached to body parts like nature's defenses, it can be drawn, opened, and used quickly. Whether coring an apple or walking through the Big Apple's core, you'll find this knife useful, well-crafted and reassuring.

**BLADE:** The Worker model is available in several versions, which are ground from G2 chrome-molybdenum, high-carbon stainless steel. Offered in PlainEdge or SpyderEdge, you will find the G2 steel outstanding in abrasion resistance. We favor edge retention over rust resistance, therefore, little care to lubricate the blade periodically will add life to the knife. Each knife comes equipped with our patented hole-opener system allowing the user to deploy the knife quickly.

**HANDLE:** Slim fitted, the 300 series stainless steel and 6061-T6 aluminum gives both knives a slim contour so they are easily carried. The unique clothing clip allows you to quickly deploy or secure the knife. The Worker model is offered in right hand models.

**LOCK:** The Harvey McBurnette/Al Mar design allows the knife to be closed one handed. The positive front lock and a slightly larger heel on the blade prevent the knife from "bottoming" in the handle when in closed position.

**DESIGNERS:** Spyderco, Golden, Colorado, U.S.A.

**DIMENSIONS:**

	C01	C01TU
	Stainless Steel	TUFRAM®
Handle Material		
Overall length - Open	9.5" (240mm)	6.55" (240mm)
Overall length - Closed	5.3" (135mm)	3.9" (135mm)
Cutting edge length	3.8" (96mm)	2.5" (97mm)
Blade thickness	.12" (3mm)	.120" (3mm)
Overall thickness	.46" (11.2mm)	.445" (14mm)
Weight	5.5oz (154g)	3.68oz (108.5g)
Steel	G2	G2

**Please Note:** The stainless steel model, C01 is also available with a black carbo-nitride coating, model C01SBK.
