G•SAKAI

More than 750 years ago, the swordsmiths (Katana Zukuri) of Japan became attracted to, and settled in a small town in the Gifu mountains called Seki City. The location possessed iron-laden soil and abundant water. The mountains provided constant breezes and mild temperatures. As the centuries passed, countless sword makers developed their art within the confines of this town. The Katana (Japanese sword) remains a legend today.

Seki City is also the home of G.Sakai. G.Sakai Company is world renowned for the quality craftsmanship of its hand-made knives. While maintaining the spirit of these sword makers, G.Sakai collaborates with some of the best knife designers in the world. Performing magic in steel and modern materials brings their designs to life. I have been working with Mr. Yuhei Sakai, the force behind G.Sakai, and his family for the past 10 years. In my humble opinion; for strength, performance, fit and finish, G.Sakai consistently produces the best folding knives in the world. The spirit of the Samurai comes alive when using knives hand-made by G.Sakai.

Sal Glesser
Spyderco, Inc.

Spyderco is a small cutlery company located in Golden, Colorado. Spyderco is probably best known for its ceramic knife sharpeners namely the Tri-Angle™ Sharpmaker™, and its Clipit™ folding knives. Spyderco's success with the Clipit™ folding knives was achieved with the help of G.Sakai.
