

SpyderKeys™/Tie CLIPITS™/Mini Mariners™

SpyderKeys™/Tie CLIPITS™/Mini Mariners™

Technical Data and Features

GENERAL: SpyderKeys and Tie Clipits are designed for exceptional cutting performance whenever you need it. We have placed our 50% SpyderEdge 50% PlainEdge at your disposal, be it on your key-ring, or clipped to your tie or lapel. This multifaceted design allows you cutting power second to none in a blade this size.*

The Mini Mariner is a beautiful yet functional piece of jewelry. It is made of the same quality stainless steel, (AUS 8A) as the SpyderKeys and the Tie Clipits. This knife is an exact replica of our larger "Mariner" model, with two handles to choose from.**

BLADE MATERIAL: AUS-8A is a high-carbon, stainless steel. This metal gives superb edge retention and rust resistance.

HANDLE: These materials were chosen for both durability and beauty. This selection includes two woods, Cocobolo and Quince; a stainless steel; Stag; Red Bone; Abalone; and Blacklip-pearl-oyster.

LOCK: The H. McBurnette/Al Mar designed front lock permits the blade to be closed with one hand. In the closed position, this lock system keeps the cutting edge from touching the spring holder.

DESIGNER: Sal Glessner, Golden, Colorado

DIMENSIONS:
