

Native C41	
Blade Steel.....CPM 440V	Length Blade.....3 1/8" 80mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 7/8" 100mm
Diam. Blade Hole.....15/32" 12mm	Length Cutting Edge.....2 1/2" 66mm
Edge Type.....PlainEdge, SpydeEdge	Length Overall.....7" 179mm
Weight.....2.4oz 69g	Hardness.....Rc 56-57

NATIVE C41BK & NATIVE II C41

The Native and Native II combines cutting power and uncommon features in a moderate size to tackle a variety of demanding chores. The handle on both models will tolerate extreme use. The Native handle is formed of lightweight FRN and the Native II handle is made from sturdy stainless steel. The lightweight version incorporates a unique bi-directional pattern on both sides that graduates out from center - this pattern is designed to help prevent forward or backward slipping. Both ergonomic handle designs maximize control along with four other features: the front lock (which facilitates one-hand closing); the modified stainless steel black clip (reversible for right/left carry and mounted as part of the lanyard hole); the substantial finger choil; and the texturing at the base of the blade spine. Each spearpoint-style blade includes the Spyderco Trademark Round Hole and a pronounced swedge, and both the blade and swedge are hollow-ground. A handful of working tool, the Native is made in Golden, Colorado and is great for everyday use.

Native II C41	
Blade Steel.....AUS-10	Length Blade.....3 1/8" 80mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 7/8" 100mm
Diam. Blade Hole.....15/32" 12mm	Length Cutting Edge.....2 1/2" 66mm
Edge Type.....5050	Length Overall.....7" 177mm
Weight.....4.8oz 131g	Hardness.....Rc 58-59

Calypso Jr. II C52	
Blade Steel.....AUS-8	Length Blade.....2 7/8" 72mm
Blade Thickness.....1/8" 3mm	Length Closed.....4" 100mm
Diam. Blade Hole.....7/16" 11mm	Length Cutting Edge.....2 1/2" 63mm
Edge Type.....PlainEdge, SpydeEdge	Length Overall.....6 5/8" 170mm
Weight.....4.2oz 120g	Hardness.....Rc 58-59

**CALYPSO JR. II C52
CALYPSO JR. C52BM / C52BK**

Made to feel like a natural extension of the hand, this highly refined design is an upgrade of an earlier CLIPIT. It is offered in stainless steel (with a hollow-ground blade) or lightweight black Micarta (with a flat-ground blade). The finger choil on both versions provides a smooth transition between the handle and the blade. The "cusp" on each blade spine (above the Spyderco Trademark Round Hole) allows for reliable thumb placement and superior cutting control. The clothing clip is placed just above the pivot pin so that this mid-sized folder sits comfortably deep in the pocket. Large enough to handle substantial chores but small enough for daily carry, the Calypso Jr. is ideal as a general utility tool. Micarta available until inventory depleted.
