

Spyderco

SPRINT RUNS!

Spyderco has been introducing new and innovative knife designs for more than 25 years. Occasionally we will re-release or update a design and offer it as a Sprint Run. Sprint Runs are limited to production of less than 1500 pieces and a great collectible offering to your Spyderco fans. Take a look at some of the upcoming Sprint Runs for 2005.

Almite "R2"

Delica Lightweight Navy Blue

Calypso Jr. Lightweight Burgundy

Blue Almite Walker

Carbon Fiber Harpy

All images are production prototypes. Actual knives may vary.

Blue Almite Walker

C22P - (PlainEdge)
An elegant and affordable variation of Spyderco's original Michael Walker design. The PlainEdge blade is hollow-ground at the cutting surface with a swedge-grind along the spine. Aluminum handle is coated in gray-blue Almite; an anodizing process that covers the handle in an enamel-like coating that is attractive, corrosion and scratch resistant. Features the Michael Walker Linerlock® and tip-up carrying pocket clip.

Blade Steel: VG-10
Blade Length: 2-1/2"
Edge Length: 2-3/8"
Handle: Almite coated Aluminum
Overall Length: 6-1/8"
Made In: Seki City - Japan
MSRP: \$99.95
Expected Delivery: April '05

Almite "R2"

C67P PlainEdge, C67S SpyderEdge
The original C67 "R" has been absent from Spyderco's product line for several years but customers still request it. This Sprint Run of "R" is similar to the original in that it looks and functions like an erector set. It's lightweight, it's sizable and it's tough, ready for hard use. Intricate skeletal handle and solid blade offer full-sized cutting power with the least amount of mass. Titanium colored aluminum handle is coated in Almite and the blade is available in PlainEdge or SpyderEdge. Three screw clip keeps the knife riding low in your pocket for convenient tip-up carry.

Blade Steel: VG-10
Blade Length: 3-1/2"
Edge Length: 3"
Handle: Almite coated Aluminum
Overall Length: 8"
Made In: Seki City - Japan
MSRP: \$129.95
Expected Delivery: July-August

Carbon Fiber Harpy

C08CFP PlainEdge, C08CFS SpyderEdge
Spyderco occasionally offers high-end carbon fiber handle variations of our best-selling models. Collectors, and those looking for something a little different, highly covet these. In a first time offering we're pairing the C08 Harpy with a carbon fiber handle. The Harpy's Hawkbill blade originated in the marine/fishing industry where severing rope, line and netting is done at arm's length quickly and efficiently. The curving arc holds what you're cutting against the sharpened edge, stopping it from slipping off the tip. It is available in PlainEdge or SpyderEdge.

Blade Steel: VG-10
Blade Length: 2-3/4"
Edge Length: 1-9/16"
Handle: Carbon Fiber
Overall Length: 6-1/2"
Made In: Seki City - Japan
MSRP: \$184.95
Expected Delivery: October-November

Featuring ZDP-189 Blade Steel:

The knife industry is constantly pushing the envelope searching for, and testing, higher performance blade steels. ZDP189 is rapidly asserting itself as an up-and-coming steel. ZDP189 Steel blades are laminated with ZDP189 being the core material (san mai). It's a powdered metal made by Hitachi that has phenomenal chemistry with 3% carbon. The hardness of the core is around 64Rc and edge retention is exceptional. Both models are being offered in a limited run with this new steel technology. The Calypso's handle is dark burgundy and the Delica's will be navy blue.

Calypso Jr. Lightweight Burgundy - C52PBRG

(PlainEdge only)
Blade Steel: ZDP189
Blade Length: 2 - 7/8"
Edge Length: 2 - 1/2"
Handle: Burgundy FRN- Fiberglass Reinforced Nylon
Overall Length: 6 - 3/4"
Made In: Seki City - Japan
Expected Delivery: June

Delica Lightweight Navy Blue - C11PBLE

Blade Steel: ZDP189
Blade Length: 3"
Edge Length: 2-11/16"
Handle: Navy Blue FRN- Fiberglass Reinforced Nylon
Overall Length: 7"
Made In: Seki City - Japan
Expected Delivery: May
